

Optim'EASE, part of the EASE Group and launched by former Big 4 Partners, is specialized in operational excellence across industries. We provide major institutions and global organizations customised solutions around their business strategy, organisation, processes and operations, leveraging on the different strengths of our firm. The team works in close collaboration with our clients to achieve measurable savings with pragmatic solutions. Optim'EASE is currently looking for:

Senior Consultant / Manager

Your next challenges:

- Participate in process reengineering, operations reviews and restructuring of operations, and in some cases, support the implementation of **new digital solutions**.
- Analyse financial and operational key figures to assess current performance and understand client's organisation, strengths and weaknesses.
- Translate organisational and operational efficiency assessments into implementable business requirements and perform gap analyses based upon the requirements to define "To Be" organisation and "To Be" processes/solutions
- Manage and/or support implementation projects by identifying, designing and implementing creative business solutions. Then develop cohesive conclusions and participate in the status report writing and presentation.
- Ensure the successful integration of newly implemented IT systems and business processes, addressing client needs with a strong understanding of digital transformation
- Create and **implement Dashboards and KPIs** to measure improvements and ensure payback to our clients, leveraging also on your **knowledge of data visualisation tools and ERP systems**.
- Measure and control the performance of your project and implement corrective actions to ensure the profitability
- Cultivate effective client relationships and pursue new client opportunities while constantly building your market eminence with the support of our network of experts
- Support with go-to-market offerings, proposals, articles and growing the Performance practice
- Manage your projects from operational, organizational and financial perspectives
- Build and develop relationships with your customers

Your skills:

- Hold a Master degree in Engineering, Business Administration, Supply Chain or a related field
- Have a proven track record of at least 4 years of experience in Consulting, with experience in data analytics and project management: strategy projects, re-organisation projects, efficiency improvement projects, digital transformation.
- Have strong problem solving and troubleshooting skills with the ability to exercise mature judgment
- Demonstrate exceptional communication skills with the ability to develop strong team and client trust relationships through business-oriented mind-set
- Be a self-starter, keen to learn and build expertise
- Knowledge / experience with **Power BI, Azure** and **Odoo** preferred, familiarity with other **data analytics** tools, **Cloud** and **ERP** systems is a differentiator
- Be **fluent in French and English**; German or Luxembourgish is considered an asset

If this opportunity is the challenge you are looking for, please forward your application in the to contact@ease.lu. All applicants must be eligible for, and have valid documents to work in the EU.
